THE MUSICAL TIMES.
AND SINGING-CLASS CIRCULAR.

EDITED BY H. C. LUNN.

Published on the First of every Month.

On and after the 1st January, 1868, this Journal will be enlarged to 32 pages (four times its original size), and, in addition to the critical notices and musical articles, will contain reviews on new music. The price will be raised from 1½d. to 2d.; but the music published in each number, when purchased separately, will be, as before, 1½d. Its extensive circulation renders it a most desirable medium for advertisers; and it should be remembered that, to ensure insertion in the current number, advertisements must be sent early. The annual subscription to the MUSICAL TIMES will be 3s., including postage.

SOLE LONDON AGENTS, NOVELLO, EWER AND CO.

"The Melody (la partie chantante) should always be clearly and distinctly enunciated, like the tones of a beautiful voice, above the subdued accompaniment of an orchestra."—THALBERG.

DAWES'S PATENT MELODY HARMONIUMS,

Besides possessing a quality of tone never before obtained in this class of instruments, have also the extraordinary capability of giving a perfectly clear and distinct additional melody; or, in other words, additional tones to the melody, with a power and variety in proportion to the number of melody stops employed; thus producing the effect of one or more solo instruments being used by separate players, in accompaniment with, or in addition to, the full harmony upon the other stops or portions of the instrument. This entirely prevents that dull, heavy monotony which was before inseparable from the very best Harmoniums, and gives a life and expression beyond the anticipations of even the most ardent admirers of the instrument.

This invention also imparts to the Melody Harmoniums the further advantage of enabling the performer, when playing a powerful melody with the right hand, to use the whole range of keys below the melody for a left hand accompaniment upon different stops, and without any break in the range (on account of the melody stops being constructed to give the melody only when the melody knob is drawn). This is a desideratum fully appreciated by all musical professors and others who have used the Melody Harmonium.

These apparently impossible and indisputably beautiful effects are produced ENTIRELY BY SELF-ACTING MECHANICAL MEANS, and without effort on the part of the player, except the swelling or accenting of this additional melody by means of a pedal or "knee swell."

The OAK HARMONIUMS are specially toned and constructed for Churches, Chapels, or Schools. The advantages to be derived from their use cannot be over estimated, the melody being so clearly brought out as to render it almost impossible for a choir to sing out of tune, when accompanied by one of these instruments.
